

## curved lightbox

The Curved light box has total graphic illumination, the cool white fluorescent tubes provide a bright even distribution of light across the entire image.

Curved light boxes are made from a 5mm rigid PVC with an opal acrylic diffuser panel and a clear PETG front cover, which can be quickly and easily removed to change the back lit graphics.

Robust, lightweight and easy to install, these units are available in standard 'A' sizes or made to order custom sizes.
