

technic lightpanel

LED Lightpanel

Designed and manufactured in the UK our LED Lightpanel **TECHNIC** combines the same technology and unique engraving patterns as our **ULTRA** panels, producing bright even illumination across the entire panel.

Our **TECHNIC** panels are a 12 volt DC driven system and are currently available in (warm white) 5000K and can be DMX controllable or dimmable with the correct interface.

At just 10mm deep and available in any size up to 3m x 1.2m in a single piece, they provide a cost effective solution for any back lighting requirement.

Suitable applications include POS, Retail & Signage, Up lighting or Back Lighting, Display Counters, Light boxes or any time you need an ultraslim, safe, energy efficient light source.
