

ultra slim

Graphic Printed Direct to Face

At only 35mm depth with full face even illumination right up to the edge of the panel, the frameless LED is ideal for applications where depth is at a premium.

A high resolution UV print direct to the face, illuminated by our energy efficient LED Lightpanel gives you stunning graphics and bright even illumination. With little heat and a life of over 30,000 hours the Frameless LED is ideal for demanding retail environments.
