

ultra thin fabric face lightbox

LED Illumination

Our ultra thin fabric faced light boxes are only 40mm depth and available in any size up to an impressive 3m x 2m, all with edge to edge completely even LED illumination.

The graphic is printed onto a stretch fabric and secured in position by a push in silicon strip ideal for quick and easy replacement. Illuminated using our UK manufactured energy efficient, virtually maintenance free LED Light panel.

Ideal for retail environments where high impact, easy to change, cost effective graphics are of major importance.
